

UNIVERSITY OF EXCELLENCE

IT ACCEPTABLE USE POLICY

Document ID: POL-IT-2024 Last Updated: January 2024

1. Purpose and Scope

This policy governs the use of university IT resources, including computers, networks, email, and internet access. All students and staff are required to comply with this policy when using university IT facilities. Violation of this policy may result in disciplinary action and referral to the Student Discipline Committee.

2. Permitted Use

University IT resources must be used primarily for academic and administrative purposes. Personal use is permitted as long as it does not interfere with academic activities or consume excessive bandwidth. Students must log out of all systems at the end of each session and must not share their login credentials.

3. Prohibited Activities

Unauthorised access to other users' accounts, files, or systems is strictly prohibited. Installing or running unauthorised software, including peer-to-peer file sharing applications, is forbidden. Using university networks for illegal activity, gambling, hacking, or distributing malicious software is prohibited. Accessing, storing, or distributing obscene, offensive, or discriminatory material is not permitted. Bypassing university security measures, firewalls, or content filters is a serious offence.

4. Email and Communication

University email accounts are provided for official academic communication. Students are expected to check their university email daily during term time. Impersonation of another person or organisation via email is prohibited. Mass emailing or spamming using university systems is not allowed.

5. Security and Compliance

All devices connected to the university network must have up-to-date antivirus software. Students must report suspected security incidents or policy violations to the IT Service Desk immediately. The university reserves the right to monitor network usage to ensure compliance with this policy. Any breach of this policy will be investigated and may result in suspension of IT access privileges.
